Introduction

Product Description

The IB960F PICMG 1.3 SHB Express CPU Card is based on the latest Intel® Q67 chipset. The platform supports 2nd generation Intel® Core processor family with LGA1155 packing and features an integrated dual-channel DDR3 memory controller as well as a graphics core.

The latest Intel® processors provide advanced performance in both computing and graphics quality. This meets the requirement of customers in the gaming, POS, digital signage and server market segment.

The Q67 platform is made with 32-nanometer technology that supports Intel's first processor architecture to unite the CPU and the graphics core on the transistor level. The IB960F SHB board utilizes the dramatic increase in performance provided this Intel's latest cutting-edge technology. Dimensions of the board are 338mm x 126mm.

IB960F FEATURES:

- Supports Intel® 2nd Generation Core i7/i5/i3 QC/DC desktop processors
- Two DDR3 DIMM, 1066/1333MHz, Max. 8GB memory
- Dual Intel® PCI-Express Gigabit LAN
- Integrated Graphics for CRT, DVI-I, LVDS displays
- 2x SATA 2.0, 2x SATA 3.0, 9x USB 2.0, 2x COM, Watchdog timer
- 2x SATA 2.0, 4x USB 2.0 for PICMG 1.3 backplane
- 1x PCI-E (x16), 1x PCI-E (x4), 4x PCI for PICMG 1.3 backplane

Checklist

Your IB960F package should include the items listed below.

- The IB960F PICMG 1.3 SHB Express Full-Size CPU Card
- This User's Manual
- 1 CD containing chipset drivers and flash memory utility
- IB64 Cable kit (Keyboard/Mouse, Serial port, Serial ATA, USB, Parallel port)
- Audio cable (Audio-18K) option
- DVI-D cable (DVIK-3) option
- Backplane (IP380L) option

IB960F Specifications

Product Name	IB960F
Form Factor	PICMG 1.3 SHB Express full size CPU card
CPU Type	- Intel® Sandy Bridge 32nm QC/DC DT processor w/ IMC & Gfx - LGA package[37.5 mm x 37.5mm](TDP: QC= 95W/65W ; DC = 65W) **Sandy Bridge-DT is NOT socket compatible with Clarkdale/Lynnfield
CPU Speed	Up to 3.1GHz
Cache	Up to 8MB
CPU Socket	LGA1155 (Socket H2)
Chipset	Intel® Q67 PCH 27 x 27 mm package size
BIOS	AMI BIOS, support ACPI Function
Memory	Intel® Core™ i7/i5/i3 DT processor integrated memory controller DDR3 1066/1333 MHz (Non-ECC) DIMM x 2, Max. 8GB
VGA	- Intel® 2 nd generation Core™ i7/i5/i3 mobile processor integrated Gfx • VGA • DVI-D X 1 (thru Level shifter ASM1442) • LVDS : 24-bit dual channel (Chrontel CH7308 via SDVO)
LAN	1. Intel® Q67 Gigabit MAC + PHY :Intel® 82579V GbE x1 2. Intel® 82583V PCI-e Gigabit LAN controller x1
USB	Intel® Q67 built-in USB 2.0 host controller, support 14 ports 10 ports on SHB, 4 ports to the backplane [Connector C]
Serial ATA	Intel® Q67 PCH built-in SATA controller, supports total 6 ports 2 x SATA (3.0) 6Gbps+ 4 x SATA (2.0) 3Gbps ports [2 x SATA 2.0 ports to the backplane Connector C]
Audio	Intel® Q67 built-in high definition audio w/ Realtek ALC662 Codec
LPC I/O	Winbond W83627DHG-P COM1 (RS232 only), COM2 (RS232/422/485) Hardware Monitor (2 thermal inputs, 4 voltage monitor inputs & 3 Fan headers) 4 Pin PWM_Fan x 1+3 Pin_DC_Fan x2
Digital IO	4 in & 4 out
KB/Mouse	Supports PS/2 Keyboard/Mouse connector [KB 1 st priority]
Expansion Slots	Mini PCI-express socket x1@solder side [Full-sized]; [Support USB client]
Edge Connectors	PS/2 Connector x1 for keyboard/mouse DB15 for VGA, 2x RJ45 for LAN 1 & 2, 1x USB 2.0
Interface	1x PCIe (16x) [Connector A & B] 4x PCIe (1x) or 1x PCIe (4x) [Connector A] 4x PCI masters [Connector D]
Onboard Header/ Connector	2x DF13 for 24-bit LVDS 1x 4-pin box header for brightness control 1x DF11-20-pin header for DVI 2x13 pins box-header x1 for Printer 2x DF11-10-pin box-header for COM1/ COM2 4x 8-pin header for USB1-8 1x 12-pin header for Audio (Line-Out, Line-In & Mic) 1x 10-pin header Digital I/O 1x 4-pin header for CPU fan (PWM smart fan) 1x 3-pin x2 header for system fan (DC-fan) 6x SATA (Black connectors x4 for SATA2; Blue connectors x2 for SATA 3) 1x 10-pin header Front panel
Watchdog Timer	Yes (256 segments, 0, 1, 1, 2...255 sec/min)
System Voltage	ATX
Others	LAN Wakeup
Board Size	338mm x 126mm

Board Dimensions

Installations

This section provides information on how to use the jumpers and connectors on the IB960F in order to set up a workable system. The topics covered are:

Installing the CPU	6
Installing the Memory	7
Setting the Jumpers.....	8
Connectors on IB960F	13

Installing the CPU

The IB960F board supports an LGA1155 Socket (shown below) for Intel Sandy Bridge processors.

To install the CPU, unlock first the socket by pressing the lever sideways, then lift it up to a 90-degree. Then, position the CPU above the socket such that the CPU corner aligns with the gold triangle matching the socket corner with a small triangle. Carefully insert the CPU into the socket and push down the lever to secure the CPU. Then, install the heat sink and fan.

NOTE: *Ensure that the CPU heat sink and the CPU top surface are in total contact to avoid CPU overheating problem that would cause your system to hang or be unstable.*

Installing the Memory

The IB960F board supports two DDR3 memory socket for a maximum total memory of 8GB in DDR3 DIMM memory type.

Installing and Removing Memory Modules

To install the DDR3 modules, locate the memory slot on the board and perform the following steps:

1. Hold the DDR3 module so that the key of the DDR3 module aligned with that on the memory slot.
2. Gently push the DDR3 module in an upright position until the clips of the slot close to hold the DDR3 module in place when the DDR3 module touches the bottom of the slot.
3. To remove the DDR3 module, press the clips with both hands.

Setting the Jumpers

Jumpers are used on IB960F to select various settings and features according to your needs and applications. Contact your supplier if you have doubts about the best configuration for your needs. The following lists the connectors on IB960F and their respective functions.

Jumper Locations on IB960F	9
JP1, JP2, JP3: RS232/RS422/RS485 (COM2) Selection	10
JP4: COM2 RS232 RI/+5V/+12V Power Setting.....	10
JP5: COM1 RS232 RI/+5V/+12V Power Setting.....	10
JP7: ME TLS DISABLE/ENABLE (Factory use only)	10
JP8: Flash Descriptor Security Override (Factory use only)	11
JP9: LVDS Panel Power Select.....	11
JP10: Backlight Adjust	11
JP11: PWM voltage setting(Factory use only)	11
JP12: SRTC RST#(Factory use only).....	11

JP14: ATX or AT (Emulation) Mode Selection.....	12
JBAT1: Clear CMOS Contents	12

Jumper Locations on IB960F

JP1, JP2, JP3: RS232/RS422/RS485 (COM2) Selection

COM2 Function	RS-232	RS-422	RS-485
Jumper Setting (Pin closed)	JP1: 1-2	JP1: 3-4	JP1: 5-6
	JP2 3-5&4-6	JP2: 1-3&2-4	JP2: 1-3&2-4
	JP3: 3-5&4-6	JP3: 1-3&2-4	JP3: 1-3 & 2-4

JP4: COM2 RS232 RI/+5V/+12V Power Setting

JP4	Setting	Function
	Pin 1-2 Short/Closed	+12V
	Pin 3-4 Short/Closed	RI
	Pin 5-6 Short/Closed	+5V

Note: The suggested setting is RI, with maximum current lower than 1A.

JP5: COM1 RS232 RI/+5V/+12V Power Setting

JP5	Setting	Function
	Pin 1-2 Short/Closed	+12V
	Pin 3-4 Short/Closed	RI
	Pin 5-6 Short/Closed	+5V

Note: The suggested setting is RI, with maximum current lower than 1A.

JP7: ME TLS DISABLE/ENABLE (Factory use only)

JP7	ME TLS Disable/Enable
Open	Disabled (Default)
Close	Enabled

JP8: Flash Descriptor Security Override (Factory use only)

JP8	Flash Descriptor Security Override
Open	Disabled (Default)
Close	Enabled

JP9: LVDS Panel Power Select

JP9	Setting	Panel Voltage
	Pin 1-2 Short/Closed	3.3V (default)
	Pin 2-3 Short/Closed	5V

JP10: Backlight Adjust

JP10	Setting	Panel Voltage
	OPEN	3.3V (default)
	CLOSE	5V

JP11: PWM voltage setting(Factory use only)**JP12: SRTC RST#(Factory use only)**

JP12	Setting	Function
	Pin 1-2 Short/Closed (Default)	Normal
	Pin 2-3 Short/Closed	Clear ME

JP13: Backlight Enable

JP13	Setting	Panel Voltage
	OPEN	3.3V (default)
	CLOSE	5V

JP14: ATX or AT (Emulation) Mode Selection

JP14	Setting
 1 2 3	AT (Emulation)
 1 2 3	ATX

1-2: AT (Emulation), for SYS PWR_ON. Automatic power on comes after a 200ms delay.

2-3: ATX Mode, SYS PWR_ON for manual control

JBAT1: Clear CMOS Contents

JBAT1	Setting	Function
 1 2 3	Pin 1-2 Short/Closed	Normal
 1 2 3	Pin 2-3 Short/Closed	Clear CMOS

BIOS Setup

This chapter describes the different settings available in the AMI BIOS that comes with the board. The topics covered in this chapter are as follows:

BIOS Introduction.....	24
BIOS Setup.....	24
Advanced Settings.....	26
Chipset Settings.....	38
Boot Settings.....	42
Security Settings.....	43
Save & Exit Settings.....	44

BIOS Introduction

The BIOS (Basic Input/Output System) installed in your computer system's ROM supports Intel processors. The BIOS provides critical low-level support for a standard device such as disk drives, serial ports and parallel ports. It also password protection as well as special support for detailed fine-tuning of the chipset controlling the entire system.

BIOS Setup

The BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS ROM of the system stores the Setup utility. When you turn on the computer, the BIOS is immediately activated. Pressing the key immediately allows you to enter the Setup utility. If you are a little bit late pressing the key, POST (Power On Self Test) will continue with its test routines, thus preventing you from invoking the Setup. If you still wish to enter Setup, restart the system by pressing the "Reset" button or simultaneously pressing the <Ctrl>, <Alt> and <Delete> keys. You can also restart by turning the system Off and back On again. The following message will appear on the screen:

Press to Enter Setup

In general, you press the arrow keys to highlight items, <Enter> to select, the <PgUp> and <PgDn> keys to change entries, <F1> for help and <Esc> to quit.

When you enter the Setup utility, the Main Menu screen will appear on the screen. The Main Menu allows you to select from various setup functions and exit choices.

Warning: *It is strongly recommended that you avoid making any changes to the chipset defaults. These defaults have been carefully chosen by both AMI and your system manufacturer to provide the absolute maximum performance and reliability. Changing the defaults could cause the system to become unstable and crash in some cases.*

System Language

Choose the system default language.

System Date

Set the Date. Use Tab to switch between Data elements.

System Time

Set the Time. Use Tab to switch between Data elements.

Advanced Settings

This section allows you to configure and improve your system and allows you to set up some system features according to your preference.

Aptio Setup Utility					
Main	Advanced	Chipset	Boot	Security	Save & Exit
	Legacy OpROM Support				
	Launch PXE OpROM			Disabled	
	Launch Storage OpROM			Enabled

	▶ Super IO Configuration				
	▶ H/W Monitor				
					→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit

Launch PXE OpROM

Enable or Disable Boot Option for Legacy Network Devices.

Launch Storage OpROM

Enable or Disable Boot Option for Legacy Mass Storage Devices with Option ROM.

ACPI Settings

Aptio Setup Utility

Apilo Setup Utility					
Main	Advanced	Chipset	Boot	Security	Save & Exit
Enable ACPI Auto Configuration		Disabled			→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit
Enable Hibernation		Enabled			
ACPI Sleep State		S1 (CPU stop clock)			
Lock Legacy Resources		Disabled			

Enabled ACPI Auto Configuration

Enables or Disables BIOS ACPI Auto Configuration.

Enable Hibernation

Enables or Disables System ability to Hibernate (OS/S4 Sleep State). This option may be not effective with some OS.

ACPI Sleep State

Select the highest ACPI sleep state the system will enter, when the SUSPEND button is pressed.

Lock Legacy Resources

Enabled or Disabled Lock of Legacy Resources.

Wake up event settings

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
			Wake system with Fixed Time	Disabled	
			Wake up hour	0	→ ← Select Screen
			Wake up minute	0	↑ ↓ Select Item

				F1: General Help	
				F2: Previous Values	
				F3: Optimized Default	
				F4: Save ESC: Exit	

Hyper-threading

Enabled for Windows XP and Linux (OS optimized for Hyper-Threading Technology) and Disabled for other OS (OS not optimized for Hyper-Threading Technology). When Disabled, only one thread per enabled core is enabled.

Active Processor Cores

Number of cores to enable in each processor package.

Limit CPUID Maximum

Disabled for Windows XP.

Execute Disable Bit

XD can prevent certain classes of malicious buffer overflow attacks when combined with a supporting OS (Windows Server 2003 SP1, Windows XP SP2, SuSE Linux 9.2, RedHat Enterprise 3 Update 3.)

Hardware Prefetcher

To turn on/off the MLC streamer prefetcher.

Adjacent Cache Line Prefetch

To turn on/off prefetching of adjacent cache lines.

Intel Virtualization Technology

When enabled, a VMM can utilize the additional hardware capabilities provided by Vanderpool Technology.

Power Technology

Enable the power management features.

Local x2APIC

Enable Local x2APIC. Some OSes do not support this.

SATA Configuration

SATA Devices Configuration.

					→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit

DVMT Mode Select

Select DVMT Mode used by Internal Graphics Device.

DVMT/FIXED Memory

Select DVMT/FIXED Mode Memory size used by Internal Graphics Device. Options are 128MB, 256MB and Maximum.

IGD - Boot Type

Select the Video Device that will be activated during POST. This has no effect if external graphics present.

Note: When using the DVI port only, choose EFP option.

LCD Panel Type

Select LCD Panel used by Internal Graphics Device by selecting the appropriate setup item.

Panel Scaling

Select the LCD panel scaling option used by the Internal Graphics Device.

USB Configuration

Aptio Setup Utility

Aptio Setup Utility					
Main	Advanced	Chipset	Boot	Security	Save & Exit
USB Configuration				→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit	
USB Devices:					
2 Hubs					
Legacy USB Support		Enabled			
EHCI Hand-off		Disabled			
Port 60/64 Emulation		Enabled			
USB hardware delays and time-outs:					
USB Transfer time-out		20 sec			
Device reset time-out		20 sec			
Device power-up delay		AUTO			

Legacy USB Support

Enables Legacy USB support.

AUTO option disables legacy support if no USB devices are connected.

DISABLE option will keep USB devices available only for EFI applications.

EHCI Hand-off

Enabled/Disabled. This is a workaround for OSes without EHCI hand-off support. The EHCI ownership change should be claimed by EHCI driver.

Port 64/60 Emulation

Enables I/O port 60h/64h emulation support. This should be enabled for the complete USB keyboard legacy support for non-USB aware OSes.

USB Transfer time-out

The time-out value for Control, Bulk, and Interrupt transfers.

Device reset time-out

USB mass Storage device start Unit command time-out.

Device power-up delay

Maximum time the device will take before it properly reports itself to the Host Controller. 'Auto' uses default value: for a Root port it is 100ms, for a Hub port the delay is taken from Hub descriptor.

Super IO Configuration

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit

GateA20 Active			Upon Request		
Option ROM Messages			Force BIOS		
Interrupt 19 Canture			Disabled		
Boot Option Priorities					
Hard Drive BBS Priorities					

Setup Prompt Timeout

Number of seconds to wait for setup activation key.

65535(0xFFFF) means indefinite waiting.

Bootup NumLock State

Select the keyboard NumLock state.

Quiet Boot

Enables/Disables Quiet Boot option.

Fast Boot

Enables/Disables boot with initialization of a minimal set of devices required to launch active boot option. Has no effect for BBS boot options.

GateA20 Active

UPON REQUEST – GA20 can be disabled using BIOS services.

ALWAYS – do not allow disabling GA20; this option is useful when any RT code is executed above 1MB.

Option ROM Messages

Set display mode for Option ROM. Options are Force BIOS and Keep Current.

Interrupt 19 Capture

Enable: Allows Option ROMs to trap Int 19.

Boot Option Priorities

Sets the system boot order.

Security Settings

This section allows you to configure and improve your system and allows you to set up some system features according to your preference.

Aptio Setup Utility					
Main	Advanced	Chipset	Boot	Security	Save & Exit
Password Description If ONLY the Administrator's password is set, then this only limits access to Setup and is only asked for when entering Setup. If ONLY the User's password is set, then this is a power on password and must be entered to boot or enter Setup. Save Changes and Exit

Exit system setup after saving the changes.

Discard Changes and Exit

Exit system setup without saving any changes.

Save Changes and Reset

Reset the system after saving the changes.

Discard Changes and Reset

Reset system setup without saving any changes.

Save Changes

Save Changes done so far to any of the setup options.

Discard Changes

Discard Changes done so far to any of the setup options.

Restore Defaults

Restore/Load Defaults values for all the setup options.

Save as User Defaults

Save the changes done so far as User Defaults.

Restore User Defaults

Restore the User Defaults to all the setup options.

Boot Override

Pressing ENTER causes the system to enter the OS.

Launch EFI Shell from filesystem device

Attempts to Launch EFI Shell application (Shellx64.efi) from one of the available filesystem devices.

This page is intentionally left blank.

Drivers Installation

This section describes the installation procedures for software and drivers. The software and drivers are included with the motherboard. If you find the items missing, please contact the vendor where you made the purchase. The contents of this section include the following:

Intel Chipset Software Installation Utility	48
VGA Drivers Installation	49
Realtek HD Audio Driver Installation	50
LAN Drivers Installation.....	51
Intel® Management Engine Interface	53

IMPORTANT NOTE:

After installing your Windows operating system, you must install first the Intel Chipset Software Installation Utility before proceeding with the drivers installation.

Intel Chipset Software Installation Utility

The Intel Chipset Drivers should be installed first before the software drivers to enable Plug & Play INF support for Intel chipset components. Follow the instructions below to complete the installation.

1. Insert the CD that comes with the board. Click **Intel** and then **Intel(R) QM67/Q67 Chipset Drivers**.

2. Click **Intel(R) Chipset Software Installation Utility**.

3. When the Welcome screen to the Intel® Chipset Device Software appears, click **Next** to continue.
4. Click **Yes** to accept the software license agreement and proceed with the installation process.
5. On the Readme File Information screen, click **Next** to continue the installation.
6. The Setup process is now complete. Click **Finish** to restart the computer and for changes to take effect.

VGA Drivers Installation

NOTE: Before installing the *Intel(R) Q67 Chipset Family Graphics Driver*, the Microsoft .NET Framework 3.5 SPI should be first installed.

1. Insert the CD that comes with the board. Click **Intel** and then **Intel(R) QM67/Q67 Chipset Drivers**.
2. Click **Intel(R) Q67 Chipset Family Graphics Driver**.

3. When the Welcome screen appears, click **Next** to continue.

4. Click **Yes** to agree with the license agreement and continue the installation.
5. On the Readme File Information screen, click **Next** to continue the installation of the Intel® Graphics Media Accelerator Driver.
6. On Setup Progress screen, click **Next** to continue.
7. Setup complete. Click **Finish** to restart the computer and for changes to take effect.

Realtek HD Audio Driver Installation

Follow the steps below to install the Realtek HD Audio Drivers.

1. Insert the CD that comes with the board. Click **Intel** and then **Intel(R) QM67/Q67 Chipset Drivers**.
2. Click **Realtek High Definition Audio Driver**.

3. On the Welcome to the InstallShield Wizard screen, click **Yes** to proceed with and complete the installation process.

LAN Drivers Installation

1. Insert the CD that comes with the board. Click **Intel** and then **Intel(R) QM67/Q67 Chipset Drivers**.
2. Click **Intel(R) PRO LAN Network Driver**.

3. When the Welcome screen appears, click **Next**. On the next screen, click **Yes** to agree with the license agreement.
4. Click the checkbox for **Drivers** in the Setup Options screen to select it and click **Next** to continue.

5. The wizard is ready to begin installation. Click **Install** to begin the installation.

6. When InstallShield Wizard is complete, click **Finish**.

Intel® Management Engine Interface

REMARKS: The Intel iAMT 7.0 Drivers need install, but Management Engine Function not support.

The following application requires Microsoft .NET Framework 3.5 or later: Intel® Management Engine Components. Please install the latest version of Microsoft .NET Framework from Microsoft Download Center to run this application correctly.

Follow the steps below to install the Intel Management Engine.

1. Insert the CD that comes with the board. Click **Intel** and then **Intel(R) AMT 7.0 Drivers**.

2. When the Welcome screen to the InstallShield Wizard for Intel® Management Engine Components, click **Next**. On the next screen, click **Yes** to agree with the license agreement.

2. When the Setup Progress screen appears, click **Next**. Then, click **Finish** when the setup progress has been successfully installed.

Appendix

A. I/O Port Address Map

Each peripheral device in the system is assigned a set of I/O port addresses which also becomes the identity of the device. The following table lists the I/O port addresses used.

Address	Device Description
000h - 01Fh	DMA Controller #1
020h - 03Fh	Interrupt Controller #1
040h - 05Fh	Timer
060h - 06Fh	Keyboard Controller
070h - 07Fh	Real Time Clock, NMI
080h - 09Fh	DMA Page Register
0A0h - 0BFh	Interrupt Controller #2
0C0h - 0DFh	DMA Controller #2
0F0h	Clear Math Coprocessor Busy Signal
0F1h	Reset Math Coprocessor
1F0h - 1F7h	IDE Interface
2F8h - 2FFh	Serial Port #2(COM2)
2B0h- 2DFh	Graphics adapter Controller
360h - 36Fh	Network Ports
3F8h - 3FFh	Serial Port #1(COM1)

B. Interrupt Request Lines (IRQ)

Peripheral devices use interrupt request lines to notify CPU for the service required. The following table shows the IRQ used by the devices on board.

Level	Function
IRQ0	System Timer Output
IRQ1	Keyboard
IRQ3	Serial Port #2
IRQ4	Serial Port #1
IRQ8	Real Time Clock
IRQ14	Primary IDE
IRQ15	Secondary IDE

C. Watchdog Timer Configuration

The WDT is used to generate a variety of output signals after a user programmable count. The WDT is suitable for use in the prevention of system lock-up, such as when software becomes trapped in a deadlock. Under these sorts of circumstances, the timer will count to zero and the selected outputs will be driven. Under normal circumstance, the user will restart the WDT at regular intervals before the timer counts to zero.
